

September 21, 2015

It is a true pleasure for me to write this letter of recommendation for Eva Pillossof, who was my Mathematics teacher from 2011 to 2014. She is, without hesitation, one of the best teachers I have had.

Eva Pillossof has an eye for the details in Mathematics and has taught me a devotion to logic, one of the many reasons why I think she is great teacher. She is a young and motivated person who has not only taught me the basics of Mathematics but also showed me how to think out of the box which helped me not only in school but also in my development as a person and furthermore in my current studies in Law at University of Cologne, Germany.

Without my asking, she took a responsibility of helping me after classes to improve my English skills. She was able to teach the class complicated and a lot of subject matter in a short period of time because of her excellent teaching methods and the experience she already gained at her young age.

She isn't quick to judge and always tries hard to bring the best out of every of her pupils.

All in all one can say that Eva is a highly competent and caring teacher, which I see has a great qualification indeed. Please contact me if there is anything else I can do on her behalf.

Sincerely,

Georgi Geshev

Law Student University of Cologne
