

RECOMMENDATION LETTER

Eva Pillossof was my mathematics teacher in high school for three years. During these three years, she was successfully teaching 16 students in my class, including me.

In my opinion she is a very good teacher due to several reasons. Firstly, she was able to motivate me not only to study, but also to enjoy the process. Using her imagination and previous experience, she increased the level of my knowledge and helped me pass my exams. Secondly, she was one of the few teachers in school that was able to adapt her teaching methods to the needs and personalities of her students. Lastly, she was able to control the classroom in a way that everyone was on the same page, and had an equal input in the learning process.

In conclusion, I can say that Eva Pillossof is a great person who has the teaching skills needed to educate children.
